

IMC512: DIGITAL LITERACY

INDIVIDUAL ASSIGNMENT (10%): ARTICLE REVIEW

INTRODUCTION

An article review is a structured analysis of a scholarly source, such as a journal article or academic book, that involves summarizing its key arguments, findings, and underlying reasoning, as well as critically evaluating its contribution to the field. This assignment requires students to identify, read, and analyze **ONE PRIMARY RESEARCH ARTICLE** related to Digital Literacy, assessing its relevance, strengths, and limitations. The review should demonstrate an understanding of the article's scholarly impact while engaging with its ideas in a thoughtful and critical manner.

ASSIGNMENT OVERVIEW

An article review is a structured academic exercise that involves engaging critically with a scholarly source. This task requires students to summarize, analyze, and critique a primary research article related to **Digital Literacy**. The review should not only highlight the key arguments, findings, and methodology but also assess the article's contributions and limitations within its field of study.

LEARNING OBJECTIVES

By completing this assignment, students will:

- Develop critical reading and analytical skills.
- Learn to summarize academic research effectively.
- Assess the credibility and impact of a scholarly work.
- Strengthen academic writing and argumentation abilities.

ARTICLE SELECTION CRITERIA

1. The article must be a **peer-reviewed journal article** (not a blog post, magazine article, or news report).
2. It must focus on **Digital Literacy** or a closely related topic.
3. It should be a **primary research article** (containing original research findings, methodology, and discussion).
4. Published within the **last five years** to ensure relevance.
5. Approval from the instructor may be required before proceeding with the review.

ASSIGNMENT STRUCTURE

Your article review should follow this structured format:

1. Introduction (100–200 words)

- Provide the full citation of the article (in APA format as required).
- Briefly introduce the article's author, topic, purpose, and significance.
- Clearly state the objective of your review. (you can refer to this course "Learning Objectives")

2. Summary of the Article (200–400 words)

- Identify the research question or problem addressed by the article.
- Explain the methodology used in the study.
- Highlight the key findings and arguments.
- Summarize the conclusion drawn by the author(s).

3. Critical Analysis (300–700 words)

- Evaluate the **strengths** of the article (e.g., robust methodology, innovative findings, contribution to knowledge).
- Discuss the **limitations** or weaknesses (e.g., small sample size, potential bias, lack of certain perspectives).
- Compare the article with another related research (if applicable).
- Provide your own insights regarding the article's impact on the study of Digital Literacy.

4. Conclusion (100–200 words)

- Summarize the key points of your review.
- Reflect on the article's overall value to the academic field.
- Suggest any future research directions or improvements.

FORMATTING AND SUBMISSION GUIDELINES

- **Word Count:** 800–1,200 words (excluding references).
- **Formatting Style:** APA (as specified by the instructor).
- **Font & Spacing:** Times New Roman, 12-pt font, double-spaced.
- **Submission Format:** PDF.
- **Plagiarism Policy:** All reviews must be original and properly cited. Any plagiarism will result in academic penalties.
- **Deadline:** WEEK 4.

GRADING CRITERIA (10%)

Your review will be assessed based on the following criteria:

- **Comprehensiveness of Summary (3%)**
Clear and accurate representation of the article's content.
- **Depth of Critical Analysis (4%)**
Strong engagement with the article's arguments, methodology, and contributions.
- **Clarity & Organization (2%)**
Logical flow, coherence, and academic writing quality.
- **Proper Citation & Formatting (1%)**
Adherence to citation and formatting guidelines.

For any questions, please reach out before the deadline.

Happy reviewing!

IMC512: DIGITAL LITERACY

GROUP ASSIGNMENT (20%): INSTRUCTIONAL VIDEO

ASSIGNMENT OVERVIEW

This group assignment is designed to enhance students' research, collaboration, and digital communication skills through the creation of an instructional video. The video should effectively demonstrate knowledge, skills, and communication strategies related to **Digital Literacy** while engaging an audience of peers.

LEARNING OBJECTIVES

By completing this assignment, students will:

- Develop research and presentation skills.
- Enhance digital content creation abilities.
- Work collaboratively to communicate complex ideas in an engaging format.
- Practice ethical sourcing and attribution of multimedia content.

ASSIGNMENT SCOPE AND GOALS

Each group will consist of **four (4) members** and will research a topic related to **Digital Literacy**. The findings must be presented in an **instructional video** with a minimum length of **three (3) minutes**. The primary objectives are to communicate clear and accurate information in an engaging and accessible manner for an academic audience.

Deliverables

1. **Video Submission:** The video must be published on **YouTube**.
2. **Submission Link:** Share the video link with your lecturer for grading purposes.

REQUIRED ELEMENTS FOR THE INSTRUCTIONAL VIDEO

1. Length & Structure

- The video must be a **minimum of three (3) minutes** in length, including a **credit roll** listing all references.

2. Video Style & Format

- There are no restrictions on the style of the video.
- Acceptable formats include, but are not limited to:
 - Narrated slide presentations
 - Recorded lectures
 - Digital whiteboard animations
 - Stop-motion animations (Claymation)
 - Sock puppet shows
 - Animated graphics
 - Scripted scenes
 - Hand-drawn illustrations on paper
 - “Man on the street” interviews
 - A combination of multiple styles

3. Title Slide

- The video must begin with a title slide containing:
 - A **descriptive title** of the video.
 - The **names** of all group members.
 - The **name of the school/University**.
 - The **year** of production.

4. Original Content & Ethical Use of Materials

- Aim to create **original content** using your own drawings, pictures, music, animations, filmed scenes, and interviews.
- If using external content, ensure that all materials (images, videos, music, sound effects, etc.) fall under a **Creative Commons license** and are properly cited.

5. Expert Interview (*If Relevant*)

- If applicable, include an interview with an expert in the field.
- Interviews may be conducted **in person, via video conferencing, phone, or email**.
- Obtain the interviewee’s **permission** before recording.
- Be professional, courteous, and respectful of the interviewee’s time.

6. Video Release Forms (*If Relevant*)

- Any **identifiable individuals** featured in the video (e.g., interviewees, actors, narrators) must sign a **Video Release Form**.
- The completed release forms must be submitted alongside the video link.

7. References & Citations

- All external **media artifacts** (images, videos, music, sound effects, etc.) must be cited at the end of the video.
- Each reference should include:
 - A brief description of the item.
 - A web address where the item was sourced (e.g., *Picture of kitten*: www.sPCA.com).
 - A note confirming the item falls under a **Creative Commons license**.
- A separate section must credit the **sources of information** used to research the video topic, following the required academic citation format (APA, MLA, etc.).

8. Credits

- Acknowledge the contributions of **all group members**, interviewees, narrators, and anyone who assisted with production.
- Include the **course name, course number, institution, and date** in the closing credits.

9. Submission Format

- The video must be **published/uploaded to YouTube**.
- The **YouTube link** must be submitted to the lecturer before the deadline.

GRADING CRITERIA (20%)

Your instructional video will be assessed based on the following criteria:

1. **Content Accuracy & Relevance (5%)**
Quality of research and information presented.
2. **Creativity & Engagement (5%)**
Effectiveness in engaging the audience through visuals, storytelling, or presentation style.
3. **Technical Quality (4%)**
Video and audio clarity, smooth transitions, and professional execution.
4. **Originality & Ethical Use of Media (3%)**
Use of original content and proper attribution of external materials.
5. **Organization & Structure (3%)**
Logical flow, clarity, and effectiveness in conveying the message.

SUBMISSION DEADLINE: WEEK 9

For any questions, please consult your instructor well in advance of the deadline.

Good luck with your project!

IMC512: DIGITAL LITERACY

FINAL (CLASS) PROJECT (40%): Webinar/Professional Talk/Sharing Session

PROJECT OVERVIEW

This final project is designed to provide students with hands-on experience in planning, organizing, and executing an **informational event** related to **Digital Literacy**. The project allows students to conduct and manage either a **Webinar, Professional Talk, Sharing Session, or similar event** aimed at disseminating knowledge, insights, latest trends, and practical tips for individual or societal development in the field of digital literacy.

LEARNING OBJECTIVES

By completing this project, students will:

1. Develop event planning and organizational skills.
2. Gain experience in professional communication and knowledge sharing.
3. Strengthen their understanding of digital literacy trends and best practices.
4. Improve teamwork, coordination, and execution abilities.

PROJECT SCOPE & REQUIREMENTS

1. Students must **plan, execute, and document** a **Webinar, Professional Talk, or Sharing Session**.
2. The event should feature relevant **topics, speakers, and audience engagement**.
3. The content should provide **educational and professional value** related to **Digital Literacy**.

PROJECT DELIVERABLES & EVALUATION CRITERIA

The final project will be assessed based on the following key components:

1. Project Preparation (30%)

Project preparation involves the **analysis, planning, and documentation** required to successfully execute the event. This includes:

- **Project Proposal** – A brief document outlining the event objectives, target audience, key topics, and event format.
- **Minutes of Meetings** – Records of discussions and decisions made in planning meetings.
- **Engagement Letters/Emails** – Documentation of communication with invited speakers, panelists, and collaborators.
- **Event Schedule & Task Assignments** – Detailed breakdown of responsibilities and timelines.

2. Project Process (40%)

The project process refers to the **implementation, coordination, and execution** of the event. Evaluation is based on:

- **Event Execution** – How well the event was conducted in terms of professionalism, clarity, and engagement.
- **Technical Setup & Delivery** – The use of digital tools, platform reliability, and overall presentation quality.
- **Audience Interaction** – Effectiveness in engaging participants through Q&A sessions, discussions, or polls.
- **Crisis Management** – The ability to address unexpected challenges, such as technical issues or speaker availability.

3. Project Outcome (30%)

Project outcomes measure the **impact and effectiveness** of the event in achieving its objectives. This includes:

- **Participant Feedback & Reflections** – Survey results or testimonials from attendees regarding the event's value.
- **Knowledge Dissemination** – How well the event contributed to increasing awareness and understanding of digital literacy topics.
- **Final Report & Documentation** – A comprehensive report summarizing the event, its impact, lessons learned, and recommendations for future improvements.
- **Media & Publicity Materials** – Screenshots, video recordings, promotional materials, and other evidence of event success.

SUBMISSION REQUIREMENTS

- **Final Project Report**
including documentation of preparation, process, and outcomes
- **Recording of the Event**
if applicable, submission of a link to the webinar or professional talk recording
- **Supporting Materials**
presentation slides, promotional posters, participant feedback, etc.
- **Submission Deadline:** WEEK 12-14

GRADING BREAKDOWN (100 MARKS)

1. Project Preparation (30 Marks) – Quality and completeness of planning documents.

- Project Proposal (10 marks)** – Clearly outlines objectives, target audience, key topics, and event format.
- Minutes of Meetings (5 marks)** – Well-documented planning discussions and decision-making process.
- Engagement Letters/Emails (5 marks)** – Professional communication with speakers, collaborators, or sponsors.
- Event Schedule & Task Assignments (10 marks)** – Clear delegation of tasks, well-structured timeline, and preparedness.

2. Project Process (40 Marks) – Execution, professionalism, and event management.

- Event Execution (15 marks)** – Smooth conduct of the event, effective delivery, and audience engagement.
- Technical Setup & Delivery (10 marks)** – Effective use of digital platforms, high-quality presentation, and troubleshooting.
- Audience Interaction (10 marks)** – Active participation, well-managed Q&A, and discussions.
- Crisis Management (5 marks)** – Handling of unexpected challenges, adaptability, and problem-solving.

3. Project Outcome (30 Marks) – Impact, participant engagement, and final documentation.

- Participant Feedback & Reflections (10 marks)** – Surveys or testimonials indicating the event's effectiveness.
- Knowledge Dissemination (5 marks)** – Quality of insights shared and relevance to digital literacy.
- Final Report & Documentation (10 marks)** – Comprehensive event summary, key findings, and lessons learned.
- Media & Publicity Materials (5 marks)** – Well-designed promotional materials, event recordings, and other evidence of success.

Additional Guidelines

- Events may be conducted **virtually or in-person**, depending on feasibility and relevance.
- Collaboration with **guest speakers, industry professionals, or academic experts** is encouraged.
- Proper **citations and attributions** must be included for any third-party content used.
- Any event featuring guest speakers should include **written confirmation of their participation**.

For any questions or clarifications, please consult your instructor.

Good luck with your final project!
